

SiNi Software

SiNi Software brings to Autodesk® 3ds Max® powerful new plugins and tools to enhance an artist's productivity and workflow whilst engaging the rendering capabilities of leading renderers including, Vray, Corona, finalRender, Moskito, Redshift, Mental Ray, Iray, Arnold.

The name SiNi is the first syllable of founders **Simon** and **Nigel**, both 3ds Max® veterans, each with more than 25 years industry experience across VFX, games and archviz. The company was formed from an in-house production studio's creative, TD and R&D team, adapting the tools built for VFX and VIZ production requirements.

From November 2016, SiNi Software is releasing a suite of products, launching with productivity and workflow flagship software IgNite along with ProxSi, SiClone and free scene checker, Forensic. These will be sold individually or as a discounted collection through ALL ACCESS subscription. All new releases and updates are included in membership subscription.

ALL ACCESS

Benefits of ALL ACCESS membership;

- Significant discounts over single products
- All software included - IgNite (inc. 10 plugins and high-end HDRI collection), ProxSi, SiClone
- New products included.
- Access to SiNi function code for Maxscript developers, TD's and pipeline engineers.

We believe we differ from other developers by offering ALL ACCESS members the flexibility to get 'under the hood' access to our code functions, giving them the ability to create their own custom maxscript tools to meet bespoke studio pipeline requirements and build their own proprietary tools using SiNi functionality.
